

VersaSafe™ VersaLink™

**Smarter than the average safe
Stronger than the average tank**

The VersaSafe is a remarkably fast, secure, and accurate smart safe system for cash-intensive environments. The VersaSafe allows retailers to spend less time counting money and more time on the sales floor. Retailers can quickly and accurately secure cash and dramatically reduce both internal and external theft by eliminating touch points, while optimizing armored car carrier visits.

Reduce cash management costs

As outlined in the table below, traditional cash management involves a number of cumbersome steps for store managers.

VersaLink™ LEVEL MONITORING powered by TDL

3. Remote Capabilities

The VersaSafe can be paired with a powerful web-based monitoring system, **VersaLink™**, that allows users to keep track of their safes, either from a computer or via iPhone and Android applications.

With the click of a mouse, VersaLink will allow you to:

- view cash levels, both validated and dropped, in order to optimize visits.
- view, print, and save personnel, shift, and end-of-day audits.
- update VersaSafe software and bill validator firmware remotely.
- manage user accounts and VersaSafe settings.
- dispatch technicians via text message or email notifications.
- determine the overall health of the VersaSafe and individual components.

Putting these tools in the hands of the customer increases the customer's ability to monitor and control their VersaSafe and their cash management system as a whole.

Imagine, with a VersaSafe that accepts and validates cash and checks and communicates with the existing POS system and an ATM that communicates with VersaLink as well, a retailer can easily manage their entire revenue stream.

4. Customer Confidence

With the use of Triton's third party relationships and the Elite Partner program, Triton will provide each end-user with professional services, including parts, repair, and training.

The VersaSafe communicates with VersaLink using Triton Dynamic Language (TDL). TDL is the next generation in ATM and smart safe message format and communications protocol, and TDL is the de facto specification for retail ATMs worldwide. VersaSafe transactional data can be communicated with financial institutions in a number of ways – from obtaining data directly from VersaLink to generating an ACH event – you choose.

Technical Specifications*

With a color display, a simple interface and speech feedback, VersaSafe makes it easy for you to customize its functions. It tracks and timestamps every transaction, allowing you to be more effective and efficient than ever. A high-capacity electronic journal even stores thousands of transactions and user histories for reference.

Dimensions:

- 28" h x 16" w x 22" d

Weight:

- 385 lbs.

Security:

- **VersaSafe Exclusive!** Heavy duty 1/2"-steel vault construction - UL291 level 1 rated
- Electronic lock with time delay access
- Relocking vault door design to prevent drill attacks
- Vault door switch alarm
- 5-bolt floor anchoring

Power:

- Input 85-264VAC, 50/60Hz

Hardware:

- Two bill validators (1,000 note capacity each)
- 5.7" color VGA screen
- 60mm thermal printer
- Easy to clean membrane keypad
- Cash drop slot with anti-fishing design
- TCP/IP interface and dial-up support
- **VersaSafe Exclusive!** Modular control head for easy, no-tools service

Operating System:

- Microsoft® Windows® CE

VersaLink™ Remote Monitoring:

- Allows the operator to immediately view events from the Web and Mobile devices
- Improves cash management serviceability by allowing operators to proactively assess the need for pick up and delivers
- Enables easier VersaSafe or communication problem identification and troubleshooting
- Helps maintain system integrity by preventing accidental or malicious operations from unauthorized users

Optional Features:

- VersaLink Monitoring package
- API for back-office integration
- Bulk note bill acceptors
- 1,200 note capacity locking cassette
- 2,200 note capacity locking cassette
- Extended warranty
- Cencon 2000 lock with audit trail
