Introduction

This document describes an upgrade load file which allows an XScale or X2 ATM to communicate with hosts which use SSL new certificates issued by VeriSign. This upgrade load file is not required for hosts which use any other SSL certificates. A host is either a transaction processor or Triton Connect.

Platforms Affected

This release is for the following families:

- RL1600, RL2000, RL5000, FT5000, or RT2000 with XScale or X2 controllers

Hardware Support

No specific hardware is required for this software release. It can be loaded on any XScale or X2 system.

Software Requirements

The ATM must be running application version 2.4.0 or greater.

The following load files are included with this release:

- xt20cavs1.0.0.tlf - Support SSL certificates issued by VeriSign (XScale).
- xt30cavs1.0.0.tfv – Support SSL certificates issued by VeriSign (X2).

External Dependencies

None

Changes

VeriSign Class 3 certificates

This software update adds the terminal to support the following VeriSign SSL certificates:

- VeriSign Class 3 Secure Server CA - G2 (S-CN)
- Class 3 Public Primary Certification Authority - G2 (S-OU)
